

Pamplin Ph.D. Program Placement Goal Schools

Policy 630

Adopted: April 16, 214

Last Revised: November 7, 2017

As a basis for evaluating the placement success of the College's doctoral programs, the business schools in the following list have been identified as targets reflecting placements in strong research-oriented business schools. The metric used for the evaluation will be the proportion of each department's placements in these business schools.

Ph.D. Program Placement Goal School Lists will be updated every five years and schools identified on the list will be considered target placement schools beginning the year the list is released and will be active for the subsequent five academic years (i.e. Aug 10 to Aug 9). The Ph.D. Placement School list is scheduled to be updated next during the 2022 – 2023 academic year to cover

The schools were identified using the following process:

1. A superset was constructed including all schools in:
 - a. Business Week Undergraduate ranking for 2016 (114 schools);
 - b. US News Undergraduate business ranking for 2016 (a total of 99 schools rated #1 to #94);
 - c. Business Week MBA ranking for 2016 (74 US programs);
 - d. UTD research ranking (North American ranking for those schools, worldwide ranking for schools outside North America) including top 75 and ties (top 77);
 - e. Financial Times research component ranking (global ranking) including top 75.
2. A composite rank was calculated for each school as the lowest numerical rank (thus the most optimistic rank) of the five indices.
3. The Carnegie classification of all the US schools included in these lists was tabulated. The list was culled to include only RU/VH (Research University/Very High Research Activity) and RU/H (Research University/High Research Activity) universities.
4. Within Carnegie classification the schools were ordered by composite rank.
5. For Canadian schools, no Carnegie classification was available but all the universities with which the schools were associated were classed as comprehensive (thus having substantial research activity) and had a research ranking by FT in the top 75 globally.

6. The list of target schools was then identified as: 1) Carnegie RU/VH schools with composite rank up to 75, 2) Carnegie RU/H schools with composite rank up to 50, and 3) schools outside North America with Financial Times research ranking up to 75.

The list includes 100 schools from the US and Canada, and an additional 29 from outside North America. This list will be reviewed annually with any proposed changes approved by the Dean.

Change from the 2014 list: North American additions – Texas Christian (Neeley), Ohio University at Athens, Temple, Howard, Queen' University (Smith), Cincinnati (Linder). Not included: Rensselaer Polytechnic Institute, California at Riverside, Illinois at Chicago, Louisiana State (Ourso). Outside North America additions: University of New South Wales, City University Hong Kong, Singapore Management University, Sung Kylin Kwan University, Hong Kong Polytechnic University, Chinese University of Hong Kong, Manchester Business School, St. Gallen. Not Included: China Europe International Business School (CEIBS), Mannheim Business School, IMD Business School, IMD, University of Bath School of Management.

For 2017 – 2018, placements in the 2014 or 2017 lists will be counted as target placement. For 2018 – 2019 placement, the 2017 list will be used to determine target placements.

Table 1: Target PhD Placement School List

North American Schools (See Table 2 for list in alphabetical order)
