

Websites for International Programs

Policy 835

Date: August 17, 1998

In order to assure that accurate information is widely available for Pamplin International Programs and to help with the promotion of all Pamplin International Programs, I am establishing the following policy to be implemented immediately.

The Director of International Programs will be responsible for all Pamplin web sites dealing with international programs. All materials maintained on individual web sites maintained by faculty, must be approved by the Director.

The main web site should contain:

- Basic information about upcoming programs (possibly including summary tables)
- Links to faculty maintained sites about upcoming programs
- Information about whom to contact for comments about the site
